# HOW TO DECIDE WHAT TO WORK ON NEXT

# ARE YOU WORKING ON THE RIGHT THINGS?

Hey there, new entrepreneur...

I know you're super busy & stretched thinner than Kate Moss.

I know your to-do list haunts you and seems to grow, no matter how productive you are each day or how many things you check off.

*No amount of time management can help you when there are simply more tasks than time to complete them.*

If you're working all the time & wondering why you're not seeing the results you desire, you MIGHT be focused on the wrong area.

*Often as new entrepreneurs, we focus on what we know how to do, rather than the things we actually need to do.*

We'll tweak our website to perfection, but run out of time to share it with potential customers, or we'll start making cold calls but not have any clue what we're actually selling or who our ideal client is.

If you're in the early stages of business, here's a tip to guide you:  
**Focus on your fastest path to cash.**

You can use this worksheet to compare the areas of business or tasks that need your attention next, in order to get you to revenue.

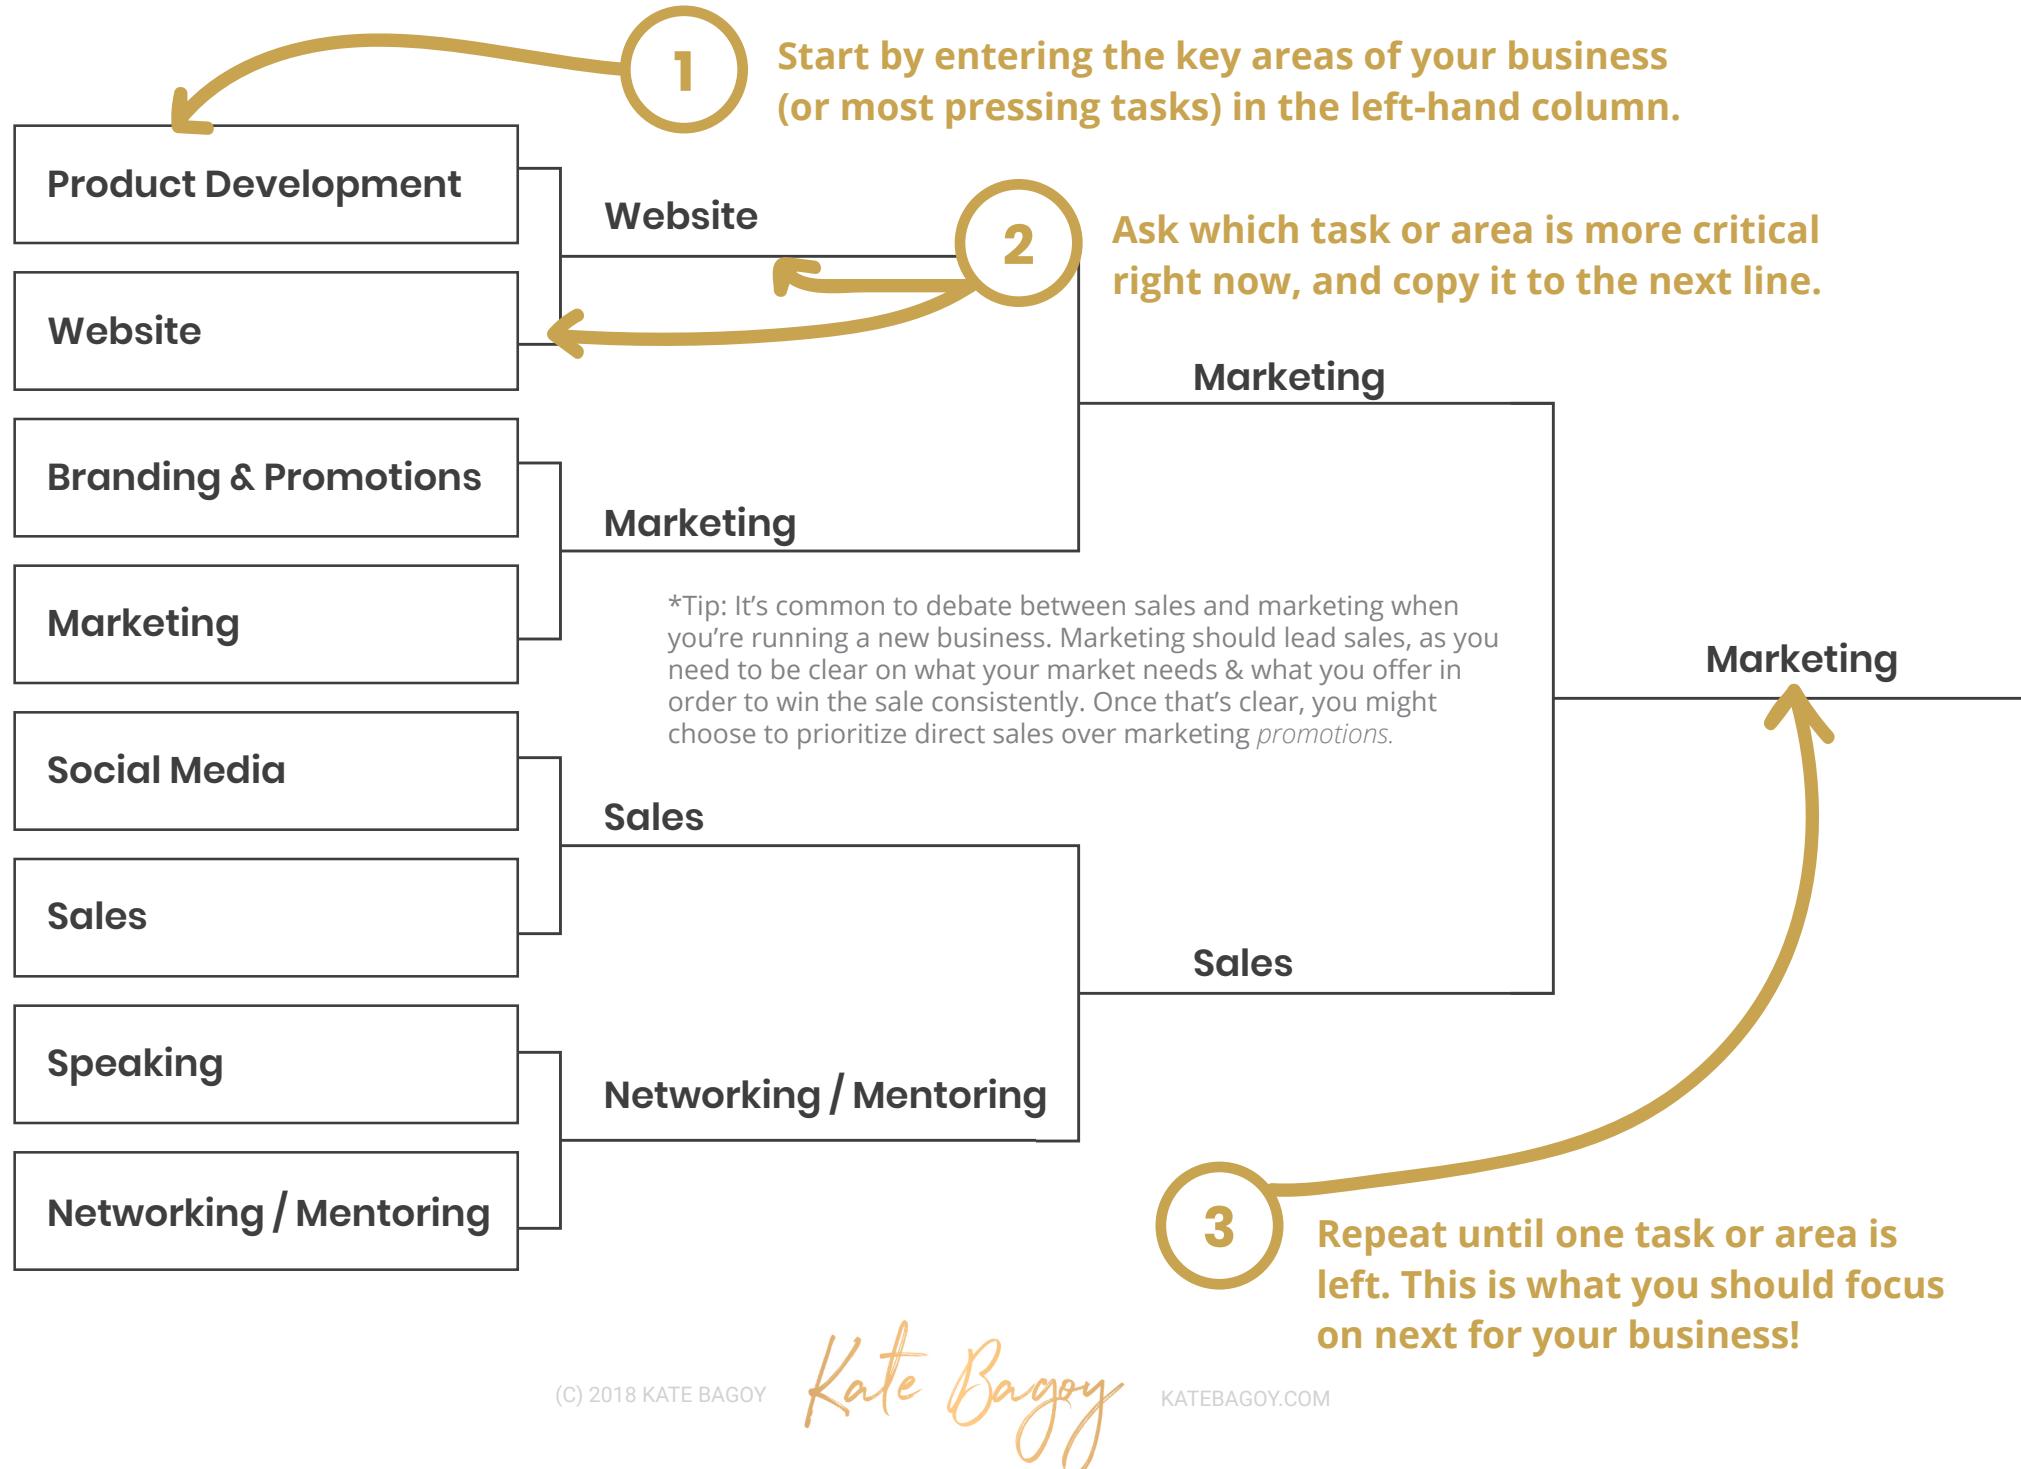

Stay focused on the right things, and you'll grow faster! And please don't hesitate to reach out if I can support you as you do.
